Particulate Respirators

WARNING

Each respirator must be properly selected based on the contaminant and concentration levels to which the worker is exposed. Respirators shown in this catalog may be used for exposures below 10X the PEL or applicable government occupational exposure limits, whichever is lower.

Failure to follow the use and fitting instructions and warnings for proper use contained on the respirator packaging and/or failure to wear the respirator during all times of exposure can reduce respirator effectiveness and **may result in sickness or death.**

For proper use, see your supervisor. For more information, call 3M OH&ESD Technical Service at 1-800-243-4630. In Canada, call 1-800-267-4414.

Hearing Protection

Important

Research suggests that the NRR may significantly overestimate the protection provided by hearing protectors in real-world, workplace conditions. 3M recommends reducing the NRR by 50% before estimating workplace protection. 3M hearing protectors are most effective when they are worn properly and worn for the entire time that you are exposed to loud noise.

3M™ Marine Adhesive/Sealant 5200

This high-performance polyurethane adhesive/sealant becomes tack free in 48 hours, completely cures in 5-7 days with no shrinkage. The seal is extremely strong. Stays flexible, allows for structural movement. Stress caused by shock, vibration, swelling or shrinking is effectively absorbed. Excellent resistance to weathering. Check the bonding and sealing jobs this product can handle for you: fiberglass to fiberglass, wood to fiberglass, motors on fiberglass transoms, under moldings. Between struts and planking. Easy to apply with manual caulking gun. Remains workable with trowel or spatula up to four hours after application. Won't sag or flow in vertical or horizontal seams. Available in tubes, cartridges and pails.
